

2 in 1 Memory Card Camera Reader

トゥーインワンメモリカードカメラリーダー
二合一记忆卡相机读卡器

Overview

With the 2 in 1 Memory Card Reader , it's easy to download photos and videos from your digital camera to your iPad or iPhone, so you can view them on the gorgeous display and share them with family and friends.

Data Transfer Speeds

It supports data transfer at up to USB 2 speeds on iPad and iPhone models, about 14MB/S~16MB/S.

Compatibility

The reader is compatible with Secure Digital (Standard SD and SDHC) memory card and Mini and Micro SD card (TF card).

It supports SD card capacity up to 256GB. Do NOT support Wi-Fi SD card.

It supports standard photo formats, including JPEG and RAW, along with SD and HD video formats, including H.264 and MPEG-4.

iPad mini 3
iPad mini 2
iPad mini (1st Generation)
iPad Air 2
iPad Air (1st Generation)

User Instruction

Use the reader to import photos and videos from a memory card to iPhone & iPad.

1. Insert a memory card that contains photos or videos into the reader.

2. Turn on iPhone & iPad and attach the reader to the Lightning Port.

3. On iPhone & iPad, select the photos and videos that you want to import.

Tips and troubleshooting

1 If photos or videos aren't transferring, be sure the memory card is inserted properly into the Reader. Completely unplug the Reader and memory card, then reconnect them and try again.

2 Make sure the card is a good one. Please be noted the Wi-Fi SD card is not supported. Please use another card and try again.

3 Check if the iOS is updated to iOS 9.2 or above for iPhone and iOS 8.0 or above for iPad.

4. This product is designed to work for the digital camera. If photos and videos were taken by digital camera, the reader will read the memory card easily. If the reader is not able to read it. It is suggested that you upgrade your iOS to iOS 13, then you can read the photos or

videos from Files app. Besides photos and videos, you can also read PDF files, MP3 files and office files like Word, Excel, PPT ,etc.
 5.Read one card each time. The iOS cannot read two card (SD and TF) simultaneously.

Questions & Answers

Q: Why we are not able to import RAW photos into the reader?

A: If you take one photo with your digital camera and choose to keep RAW and JPEG format at the same time, then you have the same photo with two formats, one by JPEG format and one by RAW format. When importing, iPhone or iPad will just import the JPEG file not the RAW file because of the iOS System. So, to solve this issue, please just choose to keep RAW format when taking photos. Then the reader can read and import the RAW format photo into iPhone and iPad.

Q: Why I have photos in my SD card, but there is no photo when importing.

A: This is because photos were not taken by the digital camera. Please check No. 4 in “Tips and troubleshooting” and try again.

Q: I want to offload the photos from my iPhone but it is not working.

A: If your iOS is blow 13 then it is not working. Please upgrade your iOS to iOS 13 and use Files app to do it.

Q: Can I use Wi-Fi SD card?

A: NO. Wi-Fi SD card is not supported. It is not standard SD card.

Q: Can I use this card reader to download photos and videos from my Dash Cam (Dashboard Camera Recorder) /drone /sport cam?

A: You can upgrade your iOS to iOS13 and then open the Files app. From Files app, you can direct view the video or photo taken by Dash Cam, drone or sport cam., and download them on your iPhone & iPad.

Remarks:

Function	iOS9.2-iOS12.4	iOS 13
